API Integration

PROFESSIONAL PROFILE

- Strategic thinker who is dedicated to continuous learning, including learning different programming languages, frameworks, and libraries.

- A passionate and self-motivated person dedicated to continuously expanding my skill set and experience as a Front End Developer.

- Skilled and detail oriented coder with the ability to effectively communicate ideas, problems and solutions individually or in collaboration with a team.

DANIEL KAPPER
FRONT END DEVELOPER

KEY PROJECTS

- Built a productivity application using Node.js, Express, Pug, and MongoDB to replace Google Sheets and Forms at TitanHouse. Used Passport.js local strategy to build an authentication system. The application passes data between controllers to reduce the number of times a user has to input data. A user can send data to other users.

- Developed a search engine by using HTML, CSS, Javascript, and GCS API. It searches through Bloomberg.com and Linkedin.com. The application has been used tens of thousands of times and is still growing.

- Built a social network with Node.js, Express, React, Redux and MongoDB, where users can create a profile and view others. In the application, users can create posts and leave comments. I am using JSON web tokens for authentication.

PROFESSIONAL EXPERIENCE

TitanHouse - Researcher & Web Developer   Washington, DC
November 2017 -- Present

- Developed tools such as search engines and productivity applications to ensure no time is wasted on repetitive tasks.
- Thoroughly researched private equity and venture capital portfolio companies and investments.
- Effectively managed my own productivity, recognized as the most efficient team member at work.

MediModo App - Co-founder   St. Louis, MO
January 2017 -- June 2017

- Designed a customer development program that measured how much value the application created for its users.
- Acquired evidence by finding and interviewing users so I could make critical decisions on whether to pivot or proceed.
- Communicated daily updates to team members in scrum meetings.

Winco Windows, Inc. - Team Leader   St. Louis, MO
May 2014 -- October 2017

- Managed a team of five employees responsible for meeting daily and weekly deadlines by building a solid and helpful team environment
- Trained employees and evaluated their performance.
- Maintained inventory records and placed orders for new materials.

EDUCATION

Missouri State University - Computer Science
Completed 3 out of 4 years
Successfully completed 90 credits, including 27 Computer Science credits. GPA 3.4. Withdrew in good standing for financial reasons.
